EDUCATION

Arya Institute of Engineering and Technology B. Tech –
Artificial Intelligence and Data Science CGPA-8.09

08/2022 – 05/2026
Jaipur, Rajasthan

EXPIERENCE

Cloud Computing Intern Learn & Build | July 2024 –August 2024

- Gained hands-on experience with **Docker**, **AWS**, and **Jenkins** for cloud-based application deployment and management.
- Built and maintained CI/CD pipelines, streamlining the process of code integration, testing, and deployment.
- Received mentorship from experienced professionals, enhancing technical proficiency.

PROJECTS

Xsocial

Livelihood 

- Developed a scalable, full-stack Twitter-like social media application with tweet creation, and user interactions.
- Implemented authentication using **Google OAuth** and **JWT-based authentication**.
- Users can post tweets, follow/unfollow others, and view real-time content updates.
- Built with **Next.js**, **React**, **TypeScript**, **Tailwind CSS**, and **Prisma ORM** for clean and scalable development.
- Integrated **PostgreSQL** as the primary database. Utilized **GraphQL APIs** for efficient data querying and **Redis** for caching and session performance.

GitHub 

WonderLust

Livelihood 

- Developed a hotel booking platform allowing users to list and manage hotel details, images, and reviews
- Implemented full CRUD operations for hotel listings with category-based filtering functionality.
- Integrated Google Maps to enhance property location visibility for users.
- Built secure user authentication and authorization for login, signup, and session handling.
- Followed the MVC architecture to maintain clean, modular, and scalable backend code.
- Designed responsive and interactive UI using HTML5, CSS, JavaScript, Bootstrap
- Used Node.js, Express.js, and MongoDB for building a robust and dynamic backend.

GitHub 

BullishX

Livelihood 

- Developed a full-stack trading web application simulating real-time stock buying, selling, and portfolio tracking.
- Implemented secure **JWT-based authentication** with cookie storage and middleware-based token validation.
- Built **RESTful backend APIs** using Node.js, Express, and MongoDB to manage users, orders, holdings, positions.
- Designed a responsive and interactive UI with **React.js**, including stock buying forms and reusable components.
- Used **React Context API** for global state management and **React Router** for dynamic routing.
- Integrated **Chart.js** to visualize portfolio value, stock performance.
- Focused on clean code architecture and modular development for scalability and maintainability.

GitHub 

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, C++, Python.

Web Technologies: HTML5, CSS, ReactJS, NextJS, Node.js, ExpressJS, MongoDB, MySQL, PostgreSQL, GSAP, ScrollTrigger, Locomotive Scroll, Bootstrap, Tailwind CSS, Material UI, WebSocket

DevOps & Cloud: Docker, Aws, Jenkins.

Tools & Platforms: Git, Redux Toolkit, Vite, Linux

Other: Data Structures & Algorithms, JSON Web Tokens (JWT), REST APIs, GraphQL APIs,

ACHIEVMENTS

- Consistently maintained a CGPA of 8 and above throughout academic career.
- Selected for the Smart India Hackathon 2024 (SIH 2024) problem statement (1703) in internal hackathon.

CERTIFICATES

- Completion of C Training (IIT BOMBAY)
- Completion of HTML Training (IIT BOMBAY)
- Completion of Advanced Cpp Training (IIT BOMBAY)
- BOMBAY) Python
- Programing(L&B)
